

Improve Your Energy Efficiency

Start now!

A trusted TPF Energy Services consultant will work with you to create an energy efficiency strategy that is in line with your short-, medium- and long-term efficiency targets. If you need, we can help you establish efficiency targets.

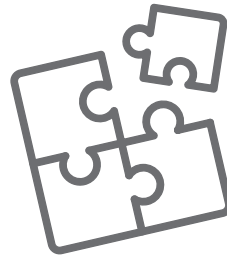

Create energy management strategies.

Identify and prioritize opportunities.

Find funding to help defer the costs of larger projects.

Next...

Partnering with your facility personnel, we will help fill the gaps in your resources related to energy management activities. TPF Energy Services can be your “one-stop shop” for everything related to energy, whether its electricity, natural gas or water, including:

- Energy auditing
 - Compressed air leak study
 - HVAC / controls study
 - Lighting audits
 - Process audits
 - Vacuum system audit
- Energy consumption analysis
- Energy purchasing strategies
- Energy storage and generation
- Energy conservation and GHG reduction projects
- Incentives, grants and other funding streams
- Process / system redesign
- Retrofit project business case analysis

Let's get going today!
